Profile

Full Stack Developer with 4+ years of experience building scalable web applications and RESTful APIs using Laravel, PHP, and React.js. Experienced in designing and delivering end-to-end products including backend architecture, API development, and frontend implementation. Strong background in OOP, SOLID principles, clean architecture, and database optimization. Skilled in AI-assisted development workflows using Cursor, GitHub Copilot, ChatGPT, and Gemini to accelerate development and improve code quality.

Professional Experience

Backend Developer (Remote)
Gomla.sa (Product-Based Company)
11/2025 – Present
- Developed and maintained core backend services for a large-scale e-commerce and beauty platform using Laravel.
- Designed and implemented Product, Offers, and Promotions modules to support business growth and marketing campaigns.
- Integrated payment gateways including Tamara and other third-party payment providers.
- Built advanced search, filtering, and recommendation features to improve product discovery and user experience.
- Developed customer engagement systems including Scratch & Win campaigns, Surveys, and Badge/Reward mechanisms.
- Implemented Complete Profile workflows to increase user activation and retention rates.
- Developed Shipping, Tax, and order processing modules to support end-to-end e-commerce operations.
- Integrated OpenAI APIs to deliver AI-powered skincare recommendations and personalized user experiences.
- Designed and consumed RESTful APIs for mobile applications and third-party integrations.
- Optimized database queries, indexing, and application performance to support high-traffic environments and reduce API response times.

Full-stack Developer
Cleverness Agency
10/2024 – 11/2025
- Developed and maintained backend services for multiple web applications using Laravel.
- Built and enhanced e-commerce platforms including ***Beituh*** and ***Hanqol***, implementing product management, order processing, and business workflows.
- Designed and developed a custom CRM Dashboard to streamline customer and business operations.
- Contributed to the development of ***HI Gold***, implementing backend features and RESTful APIs.
- Participated in developing ***Tawasol***, a contracts and agreements management platform, focusing on business logic and system workflows.
- Developed backend modules for ***Aiwan***, an e-learning platform, including course management, user enrollment, and content delivery features.
- Designed and maintained RESTful APIs and integrated third-party services.
- Optimized database queries and application performance to ensure scalability and reliability.

Full-stack Developer
Magd Soft
07/2022 – 08/2024
- Developed backend systems using PHP (Laravel), applying clean architecture and building scalable and maintainable solutions.
- Contributed to frontend development using React.js in selected projects, consuming RESTful APIs to build dynamic user interfaces.
- Supported full-stack development tasks where needed, ensuring smooth integration between backend and frontend systems.

PHP Developer
Ideas & More
07/2021 – 05/2022
- Developed comprehensive websites using **HTML5, CSS3, JavaScript, Bootstrap, WordPress, PHP, and MySQL**.
- Implemented robust **CRUD functionalities** leveraging **HTML5, CSS3, Bootstrap, Laravel, and MySQL**.
- Designed and built **end-to-end online stores** with feature-rich implementations using **HTML5, CSS3, JavaScript, Bootstrap, PHP, and MySQL**.

Education

Bachelor of Information Systems
MISR Higher Academy of Engineering and Technology
2014 – 2019

Skills

Backend Development
• PHP (OOP)
• Laravel
• Symfony
• RESTful APIs
• API Integration
• Authentication (Sanctum, Passport,jwt)

Database
• MySQL
• Microsoft SQL Server
• Query Optimization
• Indexing
• Transactions

Laravel Ecosystem
• Events & Listeners
• Notifications
• Queues & Jobs
• Task Scheduling (Laravel Scheduler)
• Caching (Redis, Laravel Cache)

DevOps & Deployment
• Docker
• CI/CD (GitHub Actions, GitLab CI/CD)
• Linux
• Nginx
• Apache
• Shared Hosting
• VPS Deployment

Frontend
- React.js
- JavaScript (ES6+)
- HTML5
- CSS3
- Bootstrap

Software Development Practices
• Agile (Scrum)
• Sprint Planning
• Jira
• Git Flow
• Code Review

Software Architecture
• SOLID Principles
• Clean Architecture
• Domain-Driven Design (DDD)
• MVC & HMVC
• Design Patterns (Repository, Strategy, Factory)
• Service Layer
• Dependency Injection
• DTO (Data Transfer Objects

Testing & Quality
• PHPUnit
• Unit Testing
• Feature Testing
• Test-Driven Development (TDD)

Admin Panels
• Laravel Filament
• Laravel Nova

Version Control & Tools
• Git
• GitHub
• GitLab
• Composer
• Postman
• Swagger / OpenAPI

AI-Assisted Development
• Cursor
• GitHub Copilot
• Gemini• ChatGPT
• Specification-Driven Development (SDD)
